

CASE STUDY – ENGINEERING R&D SERVICES INDUSTRY

Whizible Empowers Global Engineering Services Leader with a Robust Project Delivery, Recruitment and Travel Management Framework

Key benefits

- ★ Effective Tracking of resources
- ★ Effective tracking of tasks
- ★ Schedule Adherence and Effort Variance metrics are viewed by all the PM's which makes them see the Project Progress at one glance.
- ★ Effective Resource Utilization

THE CHALLENGES

The customer had a flexible delivery model involving on-site, off-site, onshore and offshore project deliveries. They also recruit their resources globally. They have over 250 field offices around the world.

Managing the collaboration amongst the global teams and servicing the deliveries without delays needed a lot of management time.

THE PAIN POINTS WERE

- ☐ Managing resource demand across projects of varied nature – on-site, off-site, nearshore, offshore and outsourced
- ☐ Tracking of projects
- ☐ Monitoring of drawing and design tasks allocated to the globally spread resources
- ☐ Managing travel process across global teams
- ☐ Managing the recruitment process of skilled talent globally

Projects Execution Management and Project Services Automation
Manage Risks, Improve Profitability, Facilitate Appraisals, Optimize Utilization

Company Background

The company is a fastest growing engineering services company offering solutions in

- Mechanical engineering
- Power delivery engineering
- Embedded systems
